EDUCATION

The University of Alabama   Tuscaloosa, AL
BS of Engineering Chemical Engineering *GPA: 3.5*   Aug 2015 - Jun 2019

The University of Alabama   Tuscaloosa, AL
MBA Data Analytics *GPA: 3.9*   Aug 2018 - Jun 2020

EXPERIENCE

PeakActivity   New York, NY
Senior Software Engineer   Nov 2021 - Present

- Designed and built a next-generation CMS page builder utilizing Next.js, enabling business users to effortlessly create cutting-edge digital experiences without the need for coding. These experiences effectively supported first-class e-commerce websites, including Dale Carnegie, Shoes For Crews, and K&N Filters, attracting over 500,000 monthly visitors.
- Developed TypeScript API integrations for Revcommerce, enabling seamless integration with partners like Signifyd, PayPal, Elasticsearch, and more. Saved clients money by reducing developer time required to add these tools to their sites.
- Forged partnerships with industry leaders Vercel, Signifyd, Storyblok, and Bigcommerce, ensuring seamless integration and support for RevCommerce.

Rapptr Labs   New York, NY
Software Engineer   Nov 2020 - Nov 2021

- Developed a high-performance React-based web application capable of efficiently handling over 10,000 incoming and outgoing sales calls daily, ensuring seamless communication and excellent user experience.
- Collaborated closely with cross-functional teams, including sales, marketing, and customer support, to gather requirements and implement features that align with business objectives and user needs.
- Implemented intuitive data visualization features, presenting key metrics and KPIs in a visually appealing and easy-to-understand manner.

Amazon.com   Staten Island, NY
Area Manager   Jun 2020 - Nov 2020

- Led and managed a team of 50-200 Amazon associates in a fast-paced distribution warehouse environment, fostering a culture of motivation, mentorship, and high-performance.
- Collaborated with the management team to establish and maintain quality control standards, driving operational excellence and meeting customer demand.

PROJECTS

RevCommerce *Nextjs, Strapi, MongoDB, Redis, Node, Kubernetes*   https://www.RevCommerce.com
A powerful e-commerce system consisting of a CMS for streamlined content, a PIM for efficient product merchandising and editing, a DAM for centralized asset organization, and a secure cart/checkout experience.

The Industry App *React Native, Supabase (Postgres), AWS Lambda*
The Industry App: A cutting-edge platform empowering photographers and videographers to effortlessly book New York City studios at hourly rates, providing a seamless and efficient experience for studio rentals.

Opsiq.ai *React, GraphQL, Node, Redis, Twilio*   https://opsiq.ai/
A machine learning-driven inside sales platform enabling seamless call management, performance tracking, and real-time collaboration for sales teams and managers.

Imprint: Learn Visually *Firebase, Swift, React, Headless CMS*   https://imprintapp.com/
An interactive learning app, creating visually engaging experiences and facilitating effective comprehension of complex concepts through immersive content.

Realtor.com *Swift, Java, Flutter*   https://www.realtor.com/
Led accessibility initiative for the Realtor.com app, ensuring inclusive user experiences by implementing industry best practices and WCAG guidelines. Drove accessibility enhancements, fostering equal access to real estate information for users of all abilities.
